

COMPARING HAWAI'I STATE/LOCAL GOVERNMENT FINANCES TO THOSE OF OTHER AMERICAN STATES

**Volume III: Appendices (Detailed Tables, Most Recent Year,
State Government Data Only)**

John M. Knox & Associates, Inc.
May 2016

INTRODUCTORY NOTE

This volume contains detailed data about the most recent information from the U.S. Census Survey of State and Local Government Finances (FY 2013, comprising the majority of data) and from the Annual Survey of Government Employment and Payroll (FY 2014, which focuses on a single month and comprises only one of the appendices below). Further calculations include sub-category percentages of total categories and divisions by State Gross Domestic Product or population to facilitate comparison.

The data in this Vol. III appendix are only for State Governments, while a preceding Vol. II appendix contained similar data (for Appendices B-F) for combined State and Local Governments. We believe the Vol. II numbers, not the numbers in this Vol. III, usually represents the most valid way to compare Hawai'i with the rest of the country. However, the "State-Only" data in this Vol. III do permit comparison of states if and when that is warranted. And Appendix A shows what percentage of the combined government data for each measure (to be found in Vol. II) comes from state-level data only.

CONTENTS

Volume II: Appendices (Detailed Tables)

- A. Percentages of Combined Local/State Government Data Coming from State Government Only
 - 1. Revenue (FY 2013)
 - 2. Expenditures (FY 2013)
 - 3. Employment and Payroll Data (FY 2014)
 - 4. Debt (FY 2013)
 - 5. Holdings (FY 2013)
- B. State Government Revenue Data, FY 2013
- C. State Government Expenditure Data, FY 2013
- D. State Government Employment and Payroll Data, FY 2014
- E. Data on State Government Debt, FY 2013
- F. Data on State Government Cash and Security Holdings, FY 2013

APPENDIX A:

**PERCENTAGES OF COMBINED LOCAL/STATE GOVERNMENT
DATA COMING FROM STATE GOVERNMENT ONLY**

For All 50 States (excluding District of Columbia, including Hawai'i)

The percentages in this appendix indicate the portions of the numbers in all other appendices of original source data in Vol. II (combined State/Local Governments) coming from the numbers to be found in this Vol. III (State Government Only).

For example, in Vol. II, on the first page of Appendix B on Revenues, Hawai'i's "Total Revenue" for combined State/ Local governments is reported as \$16,384,826. In this Vol. III, on the first page of Appendix B on Revenues, Hawai'i's "Total Revenue" for state government only is reported as \$12,944,952. The second number is 79.0% of the first – i.e., about four-fifths of all the taxes or other revenue flowing to any government in Hawai'i in FY 2013 went to the State government in particular.

On the following page, the 79.0% figure is what appears for Hawai'i in the first column. (Note: The ranking of 8th in the nation applies to this *percentage* – it should not be taken to mean that total government revenues in Hawai'i were 8th highest in the country.)
